

QUARTERLY OPERATIONS REPORT TO 30 JUNE 2015

- **WVL announces maiden JORC Inferred Mineral Resource**
- **JORC Inferred Mineral Resource (2% THM cut off) of 10.3mt with %THM of 11.71.**

SRI LANKAN PROJECT

During the quarter, the Board of Windimurra Vanadium Limited (“**Company**”) announced that the Mineral Resource Estimation on the Mannar Mineral Sands Project in Sri Lanka had been received, confirming a JORC Inferred mineral resource (2% THM cut off) of 10.3mt with %THM of 11.71.

GeoActiv (Pty) Ltd were commissioned to conduct an exploration and resource modelling program on three (3) of the company’s exploration licenses on Mannar Island, Sri Lanka.

The exploration program of drilling and sampling approximated the historical techniques followed by the GSMB in terms of drilling, sampling, TBE heavy fraction separation and mineralogical studies, but XRF and XRD work was also conducted.

The exploration program confirmed the presence of significant amounts of heavy mineral concentrations within the licenses. The tables below indicate the Inferred total heavy mineral (**THM**) resource from the licenses. Resource figures with a 2% bottom cut-off being used are shown. XRF and mineralogical studies were done to determine the mineral assemblage within the different TBE sourced heavy fractions, especially the valuable heavy minerals present in the HMC. The tables therefore also indicate the ilmenite, leucoxene, rutile and zircon % within the THM.

The Inferred mineral resource estimations for Mannar with a 2% THM cut-off.

The recently completed exploration represents a preliminary assessment, activities being restricted to the immediate beach area. Small scale drilling was undertaken but only assessed the immediate upper layer of the sands, due to the drilling method available and the presence of a water table. A more extensive programme is being planned on the back of these results using state-of-the-art techniques to assess the deposits in detail, extending the areas assessed by both depth and lateral extent. We are confident this will result in a significant increase in the resource base.

As announced on 22 April 2015, the Company confirmed that pursuant to the Option Agreement between the Company and Cuprum Holdings Limited for the acquisition of Srinel Holdings Limited ("Srinel"), these results satisfy Milestone 1, namely achieving a JORC inferred mineral resource of 10 million tonnes of heavy mineral content of not less than 5% discovered (as outlined in the Company's Prospectus dated 4 April 2014). Accordingly, subject to completion of the acquisition of Srinel, Cuprum will be issued 200,000,000 Shares in the Company.

Completion of the acquisition of Srinel is subject to the Company obtaining all necessary shareholder and regulatory approvals. The Company is working towards finalising its notice of meeting to obtain the required shareholder approvals to complete the acquisition.

Board Changes

As announced on 16 April 2015, Mr Lee Christensen was appointed as Chairman of the Board replacing Mr Paul Price.

WINDIMURRA VANADIUM PROJECT

During the quarter, a review of the Company's Western Australian mining lease M58/272 was undertaken to consider prospectivity and future exploration activities.

Competent Person Statement

The details contained in the document that relate to mineral resources and exploration results are based upon information compiled by Messrs. B Siebrits (Lead Consulting Author and Mineral Resource) and JN Badenhorst (Additional Author) from GeoActiv (Pty) Ltd. Messrs. Siebrits and Badenhorst are independent consultants for Srinel. They are Members of the South African Council for Natural Scientific Professions (registration numbers 400150/90 and 400157/07 respectively), Mr. Siebrits is also a Member of the Australian Institute of Mining and Metallurgy. They have sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which was undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Messrs. Siebrits and Badenhorst consents to the inclusion in this release of the matters based on the information in the form and context in which it appears.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
